

Antec

I SHAPE PRISM

Adjustable GPU Stand, Supporting RTX 40 Series Graphics Cards

POWERFUL COMPATIBILITY

Compact size, suitable for most mainstream chassis and thick graphics cards.

WITHOUT BRACE

Tilted graphics card hurts your motherboard and blocks the inside airflow.

WITH BRACE

Keep the graphics card stable and safe, and ensure chassis heat dissipation.

EASY TO USE

Adjust to the appropriate height and put it on the chassis. The rubber pad on the top and the magnetic base structure make it safe and steady.

DIMENSIONS
