

The Complete Home Theater Upgrade for Your PC

The Multimedia Station Family is a complete solution for home theater PC builders: a stylish IR receiver, a remote control, and iMEDIAN HD by iMON software for media management and playback. With four distinct models available, the Multimedia Station can fit the needs of all builders, while the included iMEDIAN HD software allows support of full 1080p resolution and is compatible with Windows MCE and all versions of Vista and XP. The multimedia Station provides all the hardware and software you need to turn your PC into an entertainment center, in an easy to use, easy to install package.
