

NSK1380

NEW SOLUTION SERIES

Small on the outside, big on the inside

The small and compact cubic design of the NSK1380 allows it to fit into virtually any workspace while the inside is spacious enough for your microATX motherboard, up to 4 full height PCI expansion cards, and 4 drive bays. The NSK1380's power supply is 80 PLUS® certified, ensuring that it consumes less electricity and saves you money on your power bill, with no reduction in quality performance! This case is so versatile that it can be used as a multimedia PC for your living room, a desktop PC for your office, or even a mobile gaming box for your next LAN party.
