

# NOTEBOOK COOLER

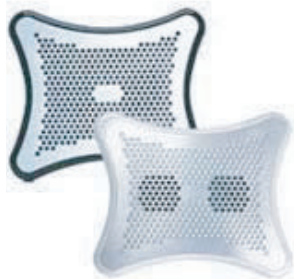

COOLING

## The perfect solution to a common problem.

Today's powerful notebook computers generate more heat than ever, resulting in serious stability and performance issues for both user and machine. Our Notebook Cooler runs off any USB port and provides quiet cooling to protect your investment and to reduce heat-related instability. Heat is dissipated through rear and side vents, and your computer, desk and lap stay cool. For all notebooks and laptops, PC and Mac.

- 1 Aluminum surface helps conduct heat away from laptop.
- 2 Fans draw cool air in and exhaust hot air out.

NoteBook Cooler Black UPC#: 0761345-75004-2  
NoteBook Cooler Pearl UPC#: 0761345-75005-9

### > Cool Your Notebook
